Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 08 December 2003.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

This is the sixth office action for U.S. Application 09/728,455 for a Cushion with Lubricated Particulates and Method of Manufacture filed by Paul M. Yates on December 1, 2000. Claims 6-21 and Claim 35 have been canceled.

#### ***Claim Rejections - 35 USC § 102***

Claims 1-3 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 3,840,920 to Voelker. Voelker discloses a cushion with a backing (23) and a cover (24) that is stretched over a selected contour. There is a core disposed within the cover, comprised of a volume of separate particulates, and an oil disposed between the particulates for enabling lubricated movement of the particulates with respect to one another in response to an outside force applied to the cover (see col.5, lines 53-58).

#### ***Claim Rejections - 35 USC § 103***

Claims 4, 5 and 23-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wolf et al in view of Voelker. Wolf et al. discloses a sheet cover (32) that is stretched and can be molded to a selected contour. The cover prevents leakage, has a backing (16), and there is a core disposed within the cover with an elastomer between the core and the cover. Wolf et al. does not specifically disclose the exact combination of particulates disposed within oil, but does disclose that a number of materials can be used, alone or in combination, for the core. Those materials include open or closed cell foam, liquid or particulate filled bags, or gels, which include oil.

Art Unit: 3632

Voelker discloses a core with particulates disposed within oil as discussed above. It would have been obvious to one of ordinary skill in the art at the time of the present invention to have utilized the core taught by Voelker, in place of the core taught by Wolf et al., for the purpose of providing a core that provides the user increased comfort when using the pad. The particulates taught by Voelker are not made of open cell foam, however, Wolf et al. teaches that open cell foam can be combined with other materials, including oil, and it would have been obvious to one of ordinary skill in the art at the time of the present invention to have used open cell foam, as taught by Wolf et al., for the particulates in the core, as a means for providing increased comfort. Wolf et al. in view of Voelker does not specifically disclosed liquid disposed within the particulates, but the liquid would be partially disposed within the particulates, due to the absorbing properties of open cell foam.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-5 and 22-34 have been considered but are moot in view of the new ground(s) of rejection.
